THE VOICE OF EMERGENCY MENTAL HEALTH PROFESSIONALS

AAEP e-News

Are Your Institutional Email Filters Blocking Your AAEP Listserv Messages?

There have been reported issues complicating access to the AAEP listserv communications pertaining to an email filter/firewall system called ProofPoint. When ProofPoint blocks these, they have not been shown to show up in Spam or Clutter files. Once you contact ProofPoint, they are able to have somebody put the listserv on the approved list.

** Just a FYI if you find out your organization uses this blocking software!

Case of the Quarter: Mrs. Doe vs. Dr. Blue

The "Case of the Quarter" column is a sample case study that highlights best practices in actual scenarios encountered through [PRMS' extensive experience in litigation and claims management](#). Specific names and references have been altered to protect clients' interests. This discussion is for informational and education purposes only and should not be relied upon as legal advice.

Excerpt:

Dr. Blue was called to the Emergency Department of Hope Hospital to evaluate a 35 year-old man who was agitated and paranoid. Dr. Blue learned from a family member that the patient had taken methamphetamine within hours of presenting to the Emergency Room. When Dr. Blue started to examine the patient, he became combative and started throwing items in the room. Dr. Blue left the room just as the patient picked up a heavy chair and threw it toward the wall. Dr. Blue called security and ordered an intramuscular injection of Benadryl, haloperidol and lorazepam. Security guards held the patient down on the floor while a nurse administered the injection. The patient calmed down but soon thereafter went into cardiac arrest and died.

Article: When the Psychiatrist is Stalked; How to reduce your risk, and what to do if it happens

Authors: **John S. Rozel, MD, MSL, Carrie Wiles, MS and Priyanka Amin, MD**

Excerpt:

Mr. A has been treating Ms. W, a graduate student, for depression. Ms. W made subtle comments expressing her interest in pursuing a romantic relationship with her psychiatrist. Dr. A gently redirected her, and she seemed to respond appropriately. However, over the past 2 weeks, Dr. A has seen Ms. W at a local park and at the grocery store. Today, Dr. A is startled to see Ms. W at her weekly yoga class. Dr. A plans to ask her supervisor for advice.

Dr. M is a child psychiatrist who spoke at his local school board meeting in support of masking requirements for students during COVID-19. During the discussion, Dr. M shared that, as a psychiatrist, he does not believe it is especially distressing for students to wear masks, and that doing so is a necessary public health measure. On leaving, other parents shouted, "We know who you are and where you live!" The next day, his integrated clinic started receiving threatening and harassing messages, including threats to kill him or his staff if they take part in vaccinating children against COVID-19.

PRMS Presents: *Psych-cess Webinar: Emergency Psychiatry*

Tuesday, April 12, 6:30 - 7:30 pm ET

PRMS is excited to announce our next virtual event, **Psych-cess: Emergency Psychiatry**, which may be of interest to your resident, fellow, and early career psychiatrist members! Psych-cess will take place via Zoom on Tuesday, April 12, 6:30-7:30 pm ET and will feature emergency psychiatry specialist, **Tony Thrasher, DO, DFAPA**, who will lead a discussion sharing more about the specialty and how he chose to make it his career and reach his current roles. Please feel free to share the attached flyer with your members, along with the registration link to sign up for free.
